EXPANSION & MOVEMENT JOINT SYSTEMS

Buildings move.
Our joints move with them.

Floor, wall, roof and seismic expansion joints — designed, made in India and installed by Vexcolt's own team.

Design, supply & install
One team and one point of accountability — never a gap between contractor and trader.

Selected from the datasheet
Every location matched on rated gap, movement and traffic class — not by eye on site.

Detailed at design stage
Joint and blockout cast in with the slab, rather than cut in at fit-out.

UK engineering, made here

HOW A FLOOR JOINT GOES IN

Installed by our own crew, step by step

01 Clean the gap and blockout
02 Bond the membrane in a loop
03 Water-test the membrane
04 Bed the frames
05 Fix the system to level
06 Finish flush with the floor

Five joint families, made in India
